

Appointment display options

Version: 2.01 | Last Modified on 25/06/2026 12:28 pm AEST

This guide covers the options available to change what is shown in the Zedmed Appointment Book and what the different booking icons mean.

Appointment icon explanations

The following icons are used to indicate the patient's status.

Icon	Description	Explanation
	Green tick (left)	Patient has been attended to the Waiting Room.
	Red folder + cross (right)	The patient's IHI is unavailable.
	Green folder + tick	The patient's IHI is available.
	Cloud icon	The patient made the appointment via Online Appointments.
	Cloud icon with +	A patient's first Online Appointment needs reconciling.
	Credit card	Credit card provided.
	File folder	File pulled & patient not attended. Replaced by a green tick when attended.
	Phone icon	Patient replied YES (green tick) to reminder SMS. Replaced when attended.
	Yellow dollar	An invoice has been raised. Replaces the attended tick.
	Green dollar	An invoice has been receipted. Replaces the attended tick.
	Grey dollar	An invoice has been voided. Replaces the attended tick.
	Camera + green tick	Telehealth appointment. Camera changes to a green tick when attended

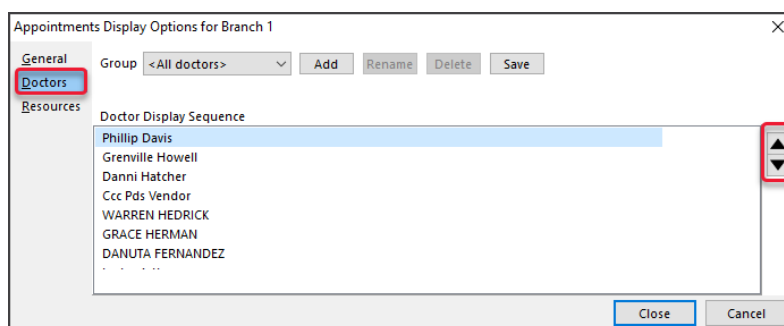

Practitioner order

You can change the order in which practitioners appear from left to right. Applies per branch.

1. In the **Appointment Grid**, select **View > Options**.
2. Select the **Doctors** tab.

3. Select the practitioner and use the up or down arrow to move them.
4. Select **Close** to save and exit.

Viewing options

The **Appointments Display Options** screen is used to change how appointments are displayed.

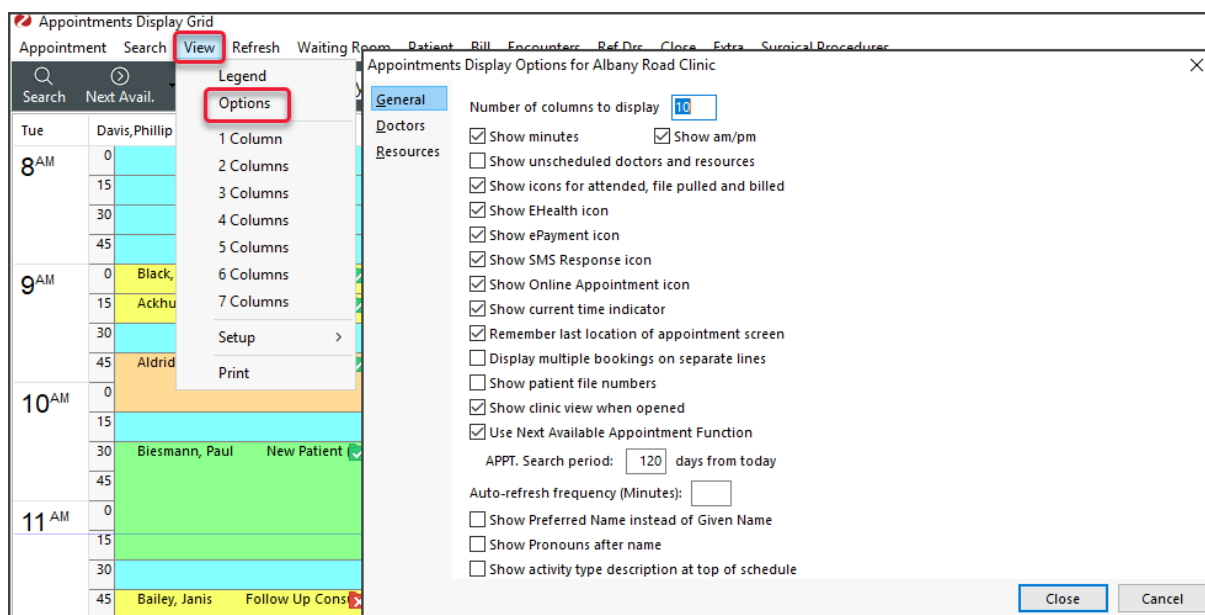

To change the display options:

1. Go to Zedmed's **Reception** tab.
2. Select **Appointments**.

The **Appointments Display Grid** screen will open.

3. Select **View > Options**.

The **Appointments Display Options** screen will open on the General tab.

View options in the General tab:

- **Number of Columns to Display**

This controls how many doctors' and resource columns will be shown in the Branch View. More doctors can be working on one day than the number of columns set, but the extra doctors will need to be seen using the scrollbar at the bottom of the display window. Up to 20 doctors' columns can be shown in the Branch view.

- **Show Minutes**

This turns on/off the "minutes" that show between each doctors column. If all your doctors work on the same

time slot (say 10 minutes), then you can have more space for each column by turning off the display.

- **Show AM / PM**

Change the time view on the left-hand column from 24-hour time to 12-hour time, e.g. 2:00 pm instead of 14:00.

- **Show Unscheduled Doctors and Resources**

If a doctor is not working on a particular day it is debatable whether to show a column for them. In a manual diary, a column would appear with a line through it. If you have, say, 7-8 doctors that work at the practice, but only 4-5 on any one day, suppressing the blank columns (non-working days) will improve the appearance of the Branch Display and the width of each doctor's column.

- **Show Icons for attended and file pulled**

When a patient has been marked as attended, either the colour of their time slot can be changed (often to a green colour), or else a "tick" icon can be placed against the slot. Similarly, a "file pulled" icon can be shown.

- **Show Multiple Bookings on Separate Lines**

Multiple bookings on a one-time slot can either be shown concatenated on one line across the page or starting on separate lines.

- **Show Patient File Numbers**

Practices that use numeric filing systems generally like to be able to see file numbers on the screen to help with pulling files, whereas those that file alphabetically do not.

- **Show Clinic View when Opened**

The normal view for a multi-doctor practice may be the Branch Surgery view with several columns, one for each doctor. However, in their consulting rooms, doctors may just want to see their own bookings for a day or a week at a time. De-activating this option re-displays the Appointments screen, on opening it, how it was last seen – in other words, it memorises the settings that applied before. This means that a doctor will only get their own patients, but a receptionist will be returned to the Branch, multi-doctor view, if that was what they were in last time they left the appointment screen.

- **Use Next Available Appointment Function**

Once this option is flagged, also set the default search period underneath. Now, you are ready to search for the next available appointment slot by clicking on Search, Next Available time, selecting the appropriate criteria, e.g., doctor, morning or afternoon, appointment type, etc. Search.

- **Show Preferred Name instead of given name & Show Pronouns after name.**

These options are available in Zedmed v37 and later.

The screenshot shows the 'Appointment Details' form in Zedmed. The patient name is 'Jones, Happy (Jonsey) (They/Them)', which is highlighted with a red rectangular box. Other visible fields include Date: Thursday, 1 August 2024; Doctor: Phillip Davis; Start Time: 10:00; End Time: 10:10; Type: Std Consultation; and Contact Details for the patient.

- **Show activity type description at top of schedule (Zedmed v38.7.2 and later)**

Displays the Activity Type's name in the earliest free spot in a block of scheduled time.

View options in the Doctors tab:

- **Doctor Groups**

It is sometimes convenient to see a subset of the working doctors on a day, e.g., just lady doctors or those with O&G qualifications. You can create and name a doctor group and then add doctors to it. One doctor can belong to several different doctor groups.

- **Doctor and Resource Display Sequences**

Controls in what order doctors appear in the Branch View. It is usually best to have the senior or full-time doctors on the left side (top of the list) and the part-timers and locums towards the right side of the screen (bottom of the list). Doctors will always be displayed before Resources (from left to right on the screen).

Custom colours

You can set the colours for unavailable slots and unscheduled times in the Appointment Book.

To change a default colour:

1. In the Appointment Book, select **View > Legend**.
2. Select the colour to change next to the **Legend**.
3. Select a new colour from the **Set Colours** dialogue, then select **OK**.

The screenshot shows an appointment book interface with a 'Set Colours' dialog box open. The dialog box has a title bar with a close button (X). The main text reads: "These colours are used when there is one booking in a slot, if that booking does not have a type." Below this text are two sections: "Set Text Colour" with a "Sample Text" field and "Set Background Colour". At the bottom of the dialog are "Cancel" and "OK" buttons. A red arrow points from the "No Type" legend item at the bottom of the screen to the "Set Background Colour" section of the dialog box. The appointment book shows slots for 8 AM, 9 AM, 10 AM, and 11 AM. The 8 AM slot has an "Unavailable (08:30 - 08:45)" booking. The 9 AM slot has bookings for "41 Holloway, Knut" and "48 Banks, Jayne". The 10 AM slot has bookings for "48 Banks, Jayne", "6 Blair, Angelina", and "33 Bowles, Desiree". The 11 AM slot is empty. The legend at the bottom shows various status colors: Mult. Booking (red), No Type (blue), Attended (green), File Pulled (yellow), Not Scheduled (grey), Other Clinic (grey), Saturday (grey), and Sunday (pink).
