Capture/Import (Image)

Last Modified on 13/01/2025 2:42 pm AEDT

Import a photo into an encounter. The photos you import will be viewed as thumbnails and can be downloaded one at a time.

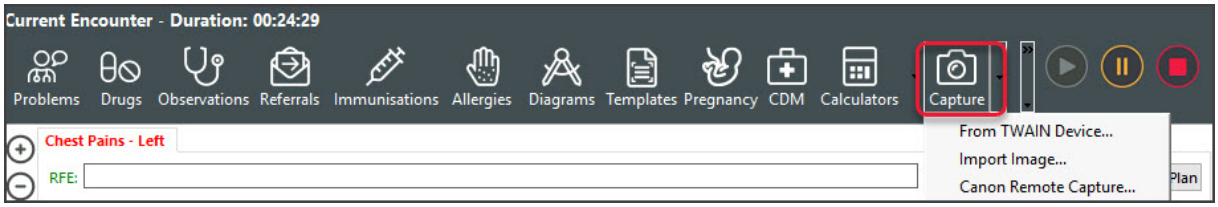
To access the Capture module:

1. Go to Zedmed's **Reception** tab.
2. Select **Clinical Records**.

   The **Zedmed Clinical** console will open.
3. Start an encounter with the patient.

   For a detailed explanation of how to do this, see the Start an encounter article.

   The **Current Encounter** pane will open and display the clinical modules when the encounter starts.
4. Select **Capture > Import image** from the **Current Encounter** menu.



5. Browse to the file and select it.
6. Open the file.
7. In the **Image** dialogue, provide a **Description** for the image.
8. Select **OK** to save the file.
9. Select **Refresh,** and the file will appear in the **Summary View** under **Images/ECG**.
