Zedmed v36.1.0

Last Modified on 24/07/2024 1:48 pm AEST

Zedmed 36.1.0 is a major release that introduces a modern theme, integration with accounting software including Xero and MYOB, HealthLink SmartForm enhancements and pronoun and gender updates.

Shortcuts to specific sections:

- New modern theme
- Surgical Partners integration
- Zedmed v36.1.0 Updates (part of the v36.0.0 release)
- Zedmed v36.0.0 HealthLink SmartForms enhancements
- Zedmed v36.0.0 Office & Clinical enhancements
- Zedmed v36.0.0 Office & Clinical updates

New modern theme

No menus or layouts have changed, but you now have the option to use the new Modern theme or the existing Classic theme.

- **The first time** you open Office and Clinical after the upgrade, you will be prompted to choose a theme.
- You can have matching or different themes in Office and Clinical.
- You can swap themes at any time if you change your mind.

The first time opening Office - select **Modern** or **Classic.**
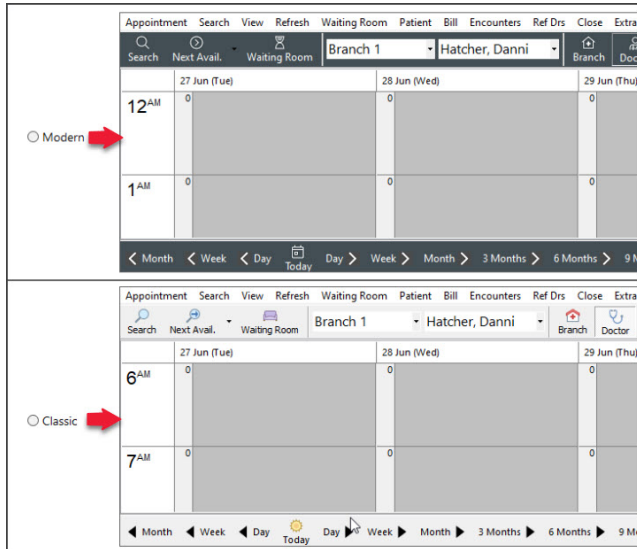

To change - **Themes** > **Modern** or **Classic**.
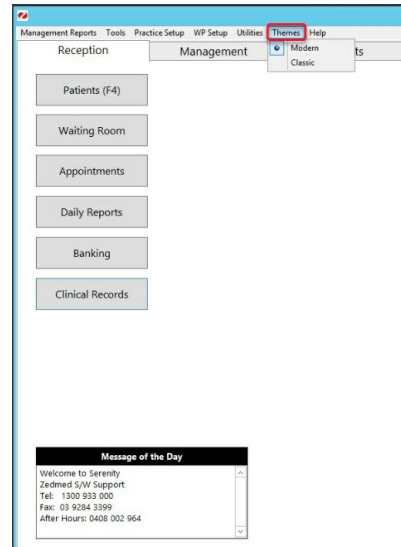

The first time opening Clinical - select **Modern** or **Classic.**
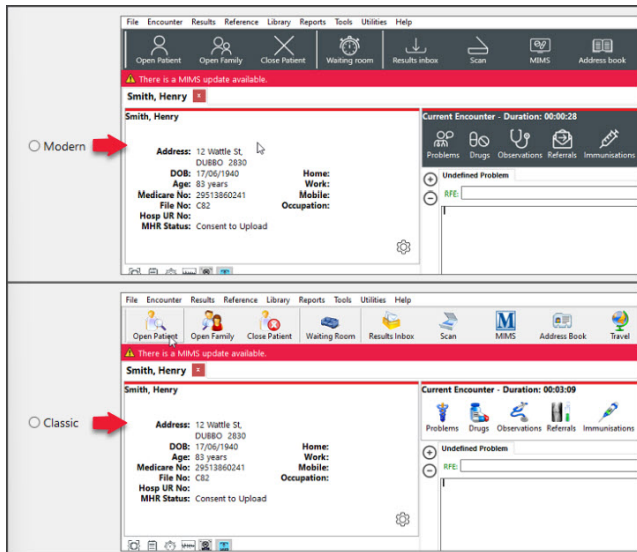

To change - **Tools** > **My Options** > **Modern** or **Classic.**
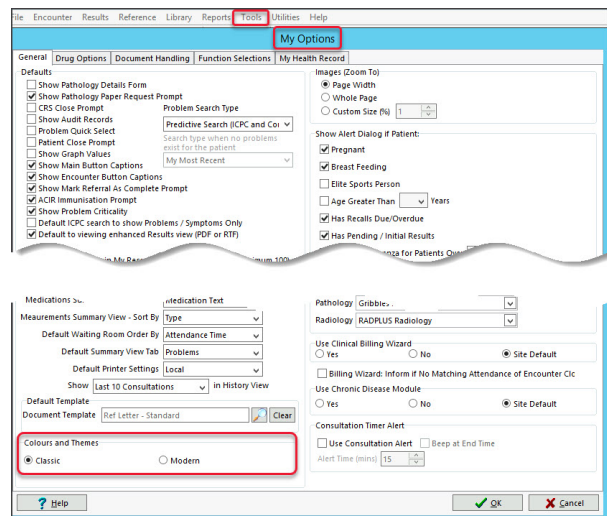

Surgical Partners integration

Surgical Partners is a financial management platform that integrates Zedmed with accounting products including Xero and MYOB. This allows you to use the financial information in Zedmed for a range of financial applications from debtors' management to banking and payroll. This functionality is enabled by registering with Surgical Partners who will configure Zedmed to send the required financial data to your accounting software each night.

Zedmed v36.1.0 Updates (part of the v36.0.0 release)
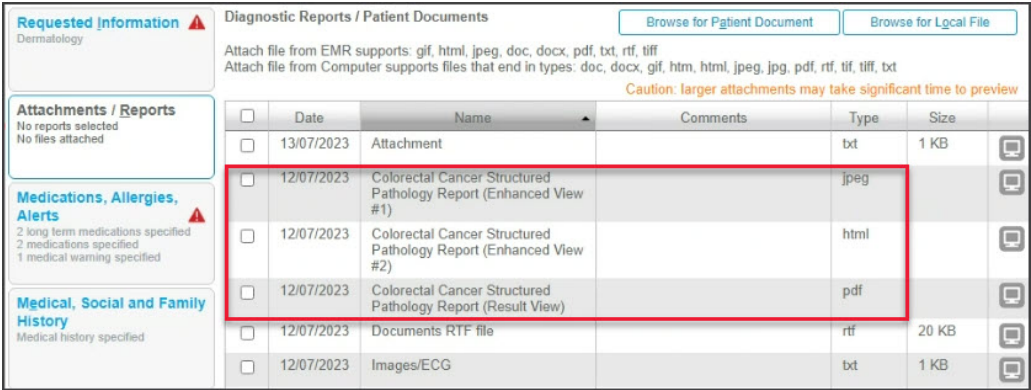

For the most up-to-date documentation version, visit https://help.zedmed.com.au/help

| Clinical	ZED-8328	**Implemented a new PDF tool to view results and scanned documents in Clinical** Removed the requirement for Adobe Reader from Zedmed. PDFs can now be viewed (both when embedded in a result and when attached from a scan) without any external PDF viewer installed.
Office	ZED-8252	**Access Violation error resolved when deleting an Appointment Type** Fixed an error that occurred when attempting to delete an appointment type from Office
Office	ZED-8360	**Corrected the Message/Buttons displayed when a Tyro Easyclaim has been canceled.** The message displayed when a user canceled a Tyro Easyclaim has been resolved and the form now allows another attempt.
Office	ZED-8423	**Deleted prescriptions are no longer displayed on HealthLink Forms.** Deleted prescriptions were still showing up as selectable options in the HealthLink SmartForm.
Clinical	ZED-8452	**The Encounter Timer no longer disappears when resuming an encounter.** Fixed an issue where the Clinical Encounter timer would no longer be displayed after resuming an existing encounter.
Office	ZED-8481	**Updated the Appointment and Full day icons for the Modern Theme.** Updated the icons displayed on the Appointment Grid for Appointment and Full Day menu bar options so they are no longer similar to Zoom In and Zoom Out icons.

Zedmed v36.0.0 HealthLink SmartForms enhancements

For new users, please follow the Zedmed SmartForms installation guide.
For existing users, please follow the manual upgrade guide.

Clinical	ZED-8267	**Improved the names used for attachments in SmartForms** Each HL7 results file can include several sections, and Clinical Results Inbox displays them as follows: 1. Result View tab. 2. Enhanced View tab - HL7 file includes only 1 additional part. 3. Enhanced View #N - HL7 file includes N additional parts. 4. 2 and 3 are not always present, depends on HL7. Results in HL7 files added as attachments to a SmartForm will be named as follows: 1. \<HL7 FResult Name\> (Result View) tab. 2. \<HL7 FResult Name\> (Enhanced View) tab - HL7 file includes only 1 additional part. 3. \<HL7 FResult Name\> (Enhanced View #N) - HL7 file includes N additional parts. 2 and 3 are not always present - depends on the HL7.
Clinical	ZED-8292	**Zedmed's Healthlink SmartForms integration is now upgradeable** The Healthlink SmartForms service installer has been updated from an MSI into an exe file (as used by other parts of the Zedmed software) so the software is now upgradeable.
Clinical	ZED-8332	**Healthlink SmartForm will display 1 attachment for HL7 files with 2 records** The functionality of Zedmed's HealthLink SmartForms integration has been improved. HL7 results that include PIT segments in addition to FT segments will be included as one attachment (as it is done in Clinical, Results).

|		
Clinical	ZED-8379	**The 'HealthLink Create Referral' button can be removed from the Encounter toolbar** Doctors can now remove the 'HealthLink Create Referral' button from the encounter toolbar. This is done in Clinical > My Options > Function Selections tab > Show the HealthLink button.
Clinical	ZED-8387	**Resolved a scenario where a staff name could appear as the provider in a SmartForm** Resolved an issue that caused the provider details (Referred By name) in a HealthLink SmartForm to be populated with a staff member's details instead of the provider's details, when the staff member's ID was the same as the doctor's code.

Zedmed v36.0.0 Office & Clinical enhancements

|		
Clinical	ZED-7979	**New Pathology & Radiology referral templates added to the Clinical Addressbook for:** • Australian Clinical Labs Comprehensive Carrier Screen Request = PathologyClinicalLabsCCS • Queensland Ultrasound for Women = RadiologyQUFW • Sydney Ultrasound for Women = RadiologySydneyUltrasoundForWomen • Vision Radiology = RadiologyVisionCardiac
		Pronoun field added to Zedmed Office & Clinical Added support for specifying preferred pronouns to Zedmed. Pronouns can be set in either the Office or Clinical Patient Details forms and are displayed in the following locations. • The selected pronouns will appear when chosen in the patient record Pronouns drop-down. • Enabled at practice and branch level. • Additional pronouns can be added in Practice Setup > Drop-down List Management> Pronouns.

| Office/ Clinical | ZED-1674 |
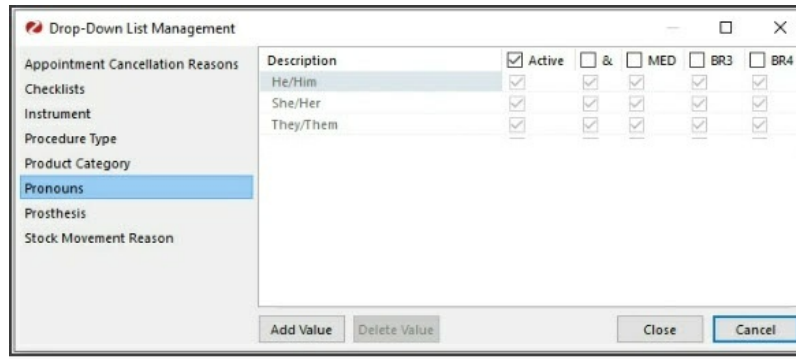

Pronouns display:

- The header of patient details summary in Clinical.
- Title of patient details in Clinical.
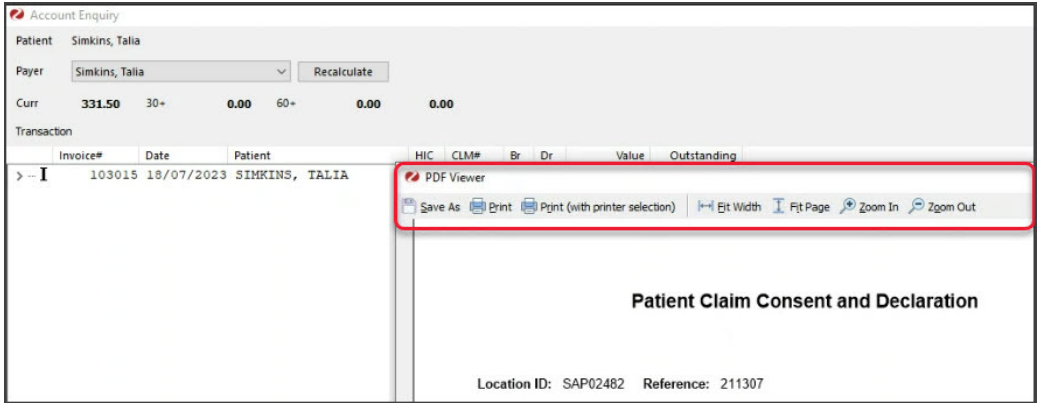

- Patient record tab in Clinical.
- Title of patient details in Office.

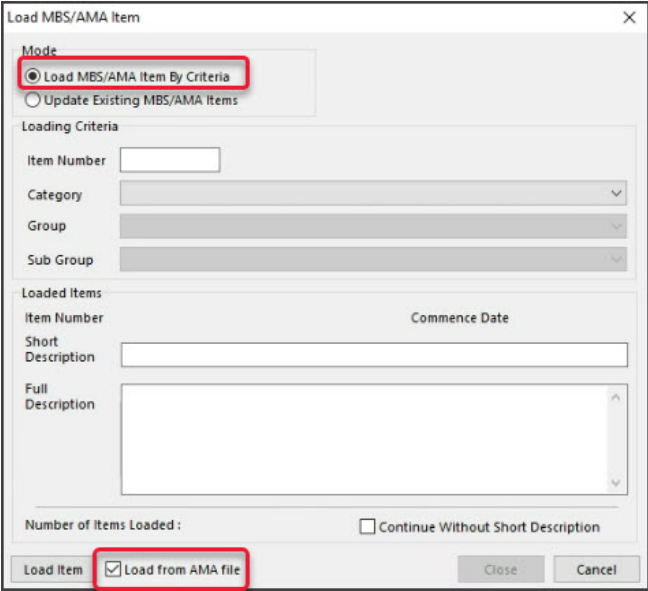

Pronouns & Sex at Birth |

Office	ZED-8194	**Changed "Gender" to "Sex at Birth"** Changed the "Gender" field to read "Sex at Birth" in Office, Clinical and the Patient Merge utility. See the screenshot above.
Office	ZED-8202	**Ethnicity is available in the Patient Merge utility** Ethnicity is now available in the Patient Merge utility when merging duplicate records. It is displayed when Advanced is selected.
Clinical	ZED-8215	**Changed the default dose for Prevenar 13 Childhood immunization** Updated the dose from 4 to 3 for the 12-month Pneumococcal (13vPCV) Childhood Scheduled Immunisation.
Office	ZED-8326	**Added the Service date to the Claims screen and Claims Report** Claims Status UI and report now show the date of the service against each item in the invoice.

Office	ZED-8370	**Replaced the PDF viewer for the "View Claim" button in Account Enquiry** Updated the application used to view PDFs in Office for Claims. Viewing a claim from the account enquiry screen is now significantly faster.

Zedmed v36.0.0 Office & Clinical updates

Clinical	ZED-8286	**Important update.** **Reduced the flicker on the Results Inbox display list** Results Inbox module has been reworked to prevent flickering as users action results.
Office	ZED-5462	**Resolved an error that occurred when merging patients with the same SMS message** When merging patients that reference the same SMS message, Zedmed Patient Merger will now only move one copy the message to the merged record. Previously it would report an error and abort the merge process.
Office	ZED-5494	**The Last (F4) Button now works in Appointments** While searching for patients on the Appointments UI, selecting the Last F4 button now selects the last opened patient in the appointment search dialog.
Office	ZED-7111	**The Delete button in Staff Maintenance>Apps Access no longer causes an Access Violation** The Delete button on the staff permissions maintenance dialog, App Access tab, will now remain disabled until a selection has been made to prevent an error.

Office	ZED-7982	**Resolved Error Data too large for variable [ITEM_CODE]. Max len = [8], actual len = [9] when running AMA Fee Load** The Load MBS/AMA Item By Criteria option now works when the Load from AMA file checkbox is selected and an AMA load fee file is used. AMA fees will now be loaded as long as the corresponding MBS item already exists, a report is displayed at the end of the import listing the items that could not be imported.
Office	ZED-7983	**Resolved Error - Param [NEWSTARTDATE] type changed from [ftSQLTimeStamp] to [ftDateTime] running AMA Update Fees** The Update Existing MBS/AMA Items with the Load from AMA file option selected will now run without error and enable the update AMA items.
Office	ZED-8233	**Statistics report - Referral Doctor criteria now correctly lists all address book entries (not just referral doctors)** Referral Doctor criteria in the Statistics Report will now only list Referral Doctor contacts who are set as Available.
Office	ZED-8247	**Resolved Error "Zedmed Office was unable to load the OLE object file" when you Select or Preview an archived letter** Fixed the issue with an error being displayed when selecting or previewing patient letters that have been archived.
Clinical	ZED-8248	**Resolved Error 'Type ID Mismatch' when importing CDA letters** When importing HL7 messages that contain XML files with a namespace prefix, Zedmed Clinical will report a more accurate error instead of returning "Type ID mismatch".

Office	ZED-8362	**Resolved an Intramail error in Sent Items** Fixed an error that occurred when viewing sent items in office intramail when the To: or CC: fields contain a combined total of more than 1000 characters.
Office	ZED-8367	**A double booking Patient's name will no longer change when editing the appointment.** Modifying an appointment by selecting it from the appointment selector (appointment 'Details' context menu option), no longer displays a different patient in the appointment selector at the end of the process.
