

# Troubleshooting & FAQ

Version: 2.00 | Last Modified on 19/06/2026 11:06 am AEST

## How often do i need to use DUO 2FA

When first logging into Zedmed Cloud, you need to authenticate with DUO 2FA.

If a Zedmed Cloud session remains inactive for 90 minutes, it will expire, and a 'session has ended' page will display. Select your Zedmed Cloud shortcut and log back in to create a new session.

## I've forgotten my Zedmed password for SSO

If you use Zedmed DUO to log in, call Zedmed Helpdesk on 1300 933 000

If you use your own organisation's SSO with Zedmed, contact your internal IT support.

## I've forgotten my Zedmed Software password

Please call Zedmed Helpdesk on 1300 933 000

## I've forgotten my Cloud password

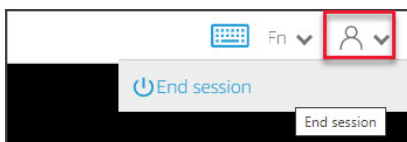

Please call Zedmed Helpdesk on 1300 933 000

## I've forgotten the phone I used for 2FA

Please call Zedmed Helpdesk on 1300 933 000

## Zedmed is unresponsive. I cannot click or type anything.

End the session by selecting the User icon >End session from the cloud menu, and then log back in.

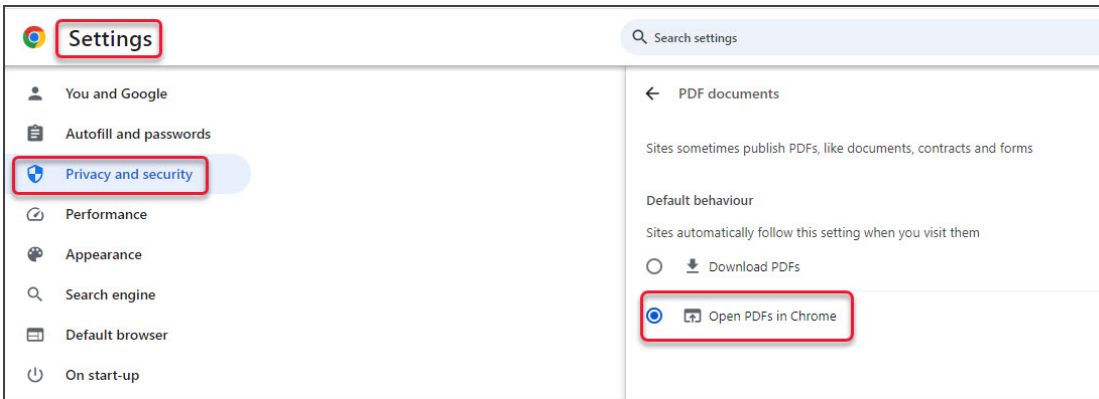

## I cannot print (PDFs download instead of opening)

Zedmed Cloud opens pages as PDFs in a new tab so they can be printed. This means the browser's setting needs to be set to open a PDF by default instead of downloading.

In Chrome this can be checked as follows:

1. Settings > Privacy and security > Site settings > Additional content settings > PDF documents.
2. Check it is set to Open PDFs in Chrome.

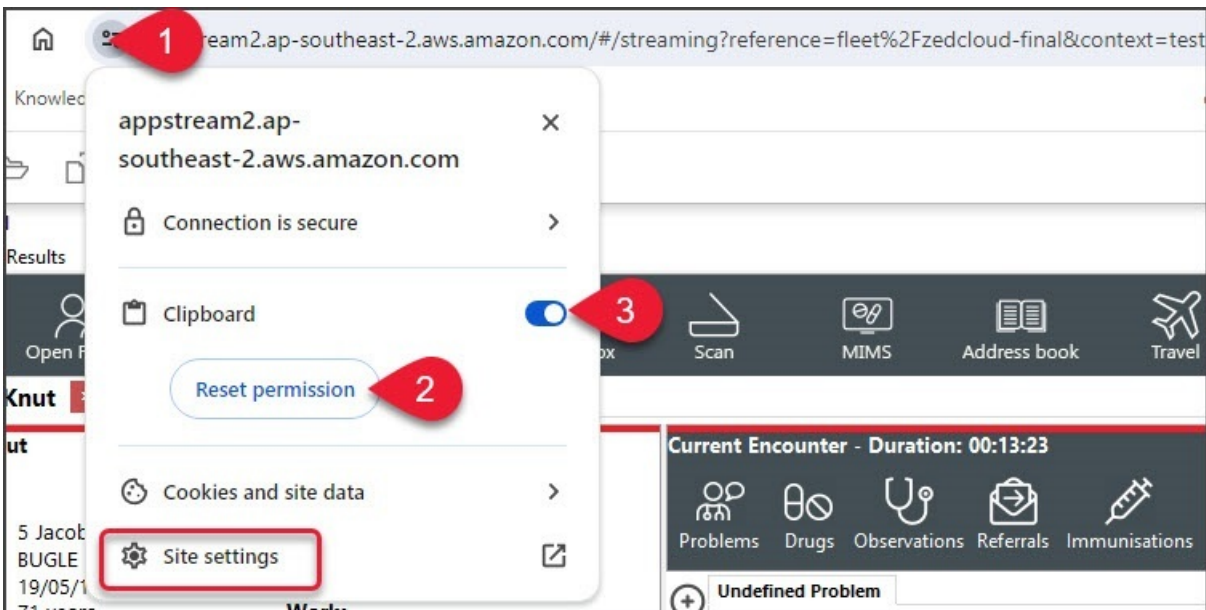

## Unblocking copy-paste in Chrome

If you selected **Block**, or are unable to copy/paste - you can manually enable copy/paste:

1. Click the padlock or connection icon at the start of the URL.
2. Select **Reset permission**.
3. Toggle on **Clipboard**.

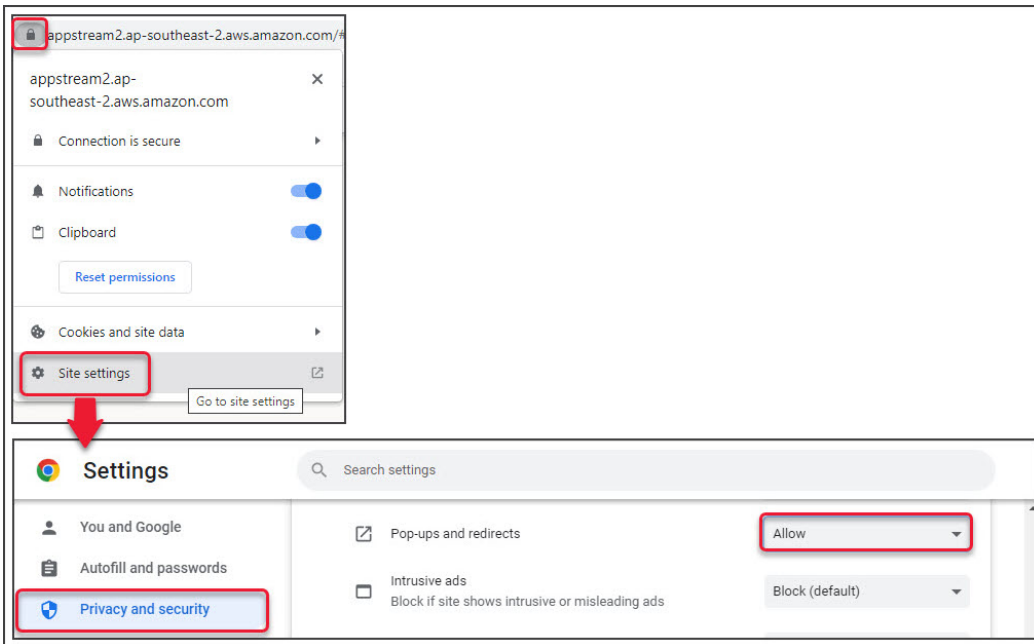

Another method is to select **Site settings** > **Privacy and security** > scroll down to **Clipboard** and change to **Allow**. [Learn more](#).

## I cannot print successive pages

This occurs when pop-ups and redirects are not allowed by the web browser (Chrome).

To resolve this in Chrome, click the lock icon and select **Site Settings** then change **Pop-ups and redirect** to **Allow**.

I have the error: 'Appstream page could not be found' when trying to print.

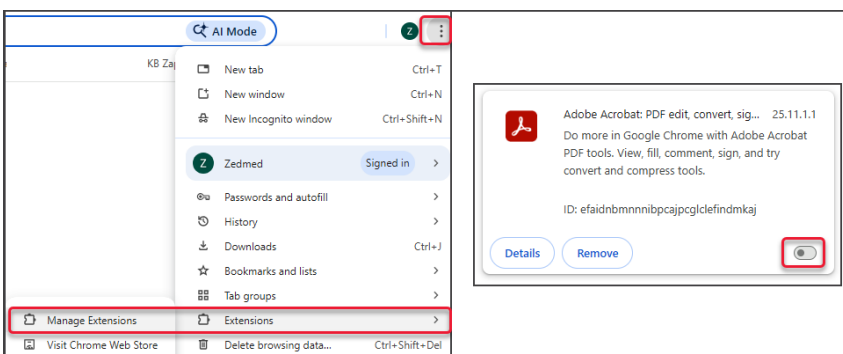

This can be caused by the web browser (Chrome) having the Adobe browser extension installed.

To resolve the error:

1. Select the 3-dots on the top right (or the jigsaw icon) to open.
2. Select **Manage Extensions**.
3. Disable the Adobe extension using the switch.

If this does not fix the problem, try disabling other extensions. You can also check if the error occurs on a different browser.

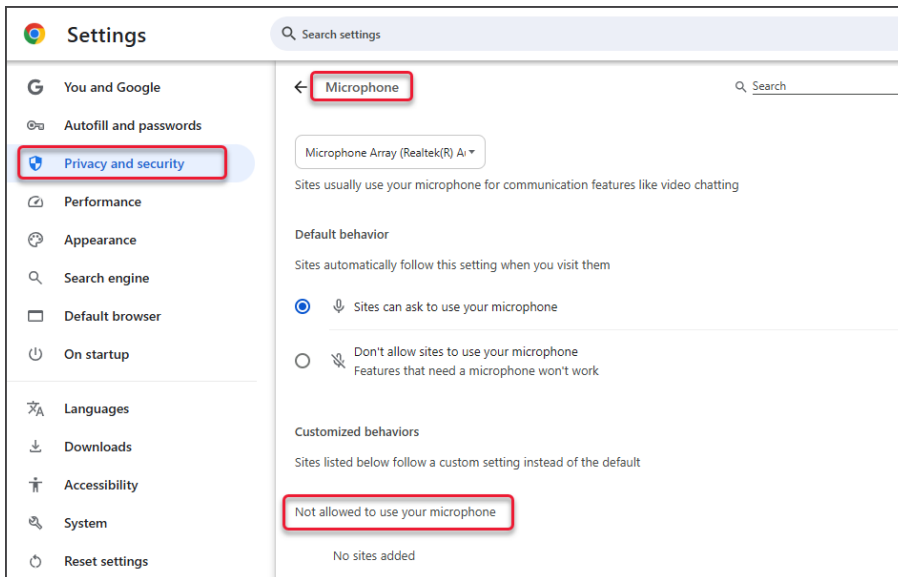

How do I enable my Microphone in Chrome if I clicked 'Block'?

To allow Chrome to use your microphone:

1. Open **Chrome Settings** ( `chrome://settings` ).

2. Go to **Privacy and security** > **Site Settings**.
3. Scroll down to **Permissions** and click **Microphone**.
4. Under “**Not allowed to use your microphone**”, look for the site you blocked.
5. Click the trash icon  to remove the block or click the dropdown and choose “**Allow**”.
6. Close settings and refresh the site.

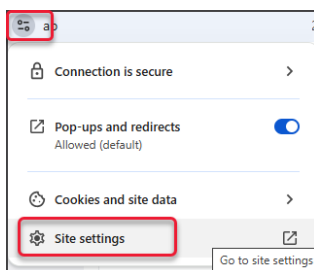

## If you suspect printing is being blocked by the web browser

Check if there are Ad blocker extensions installed, and if there are, whitelist or allow popups for Zedmed Cloud.

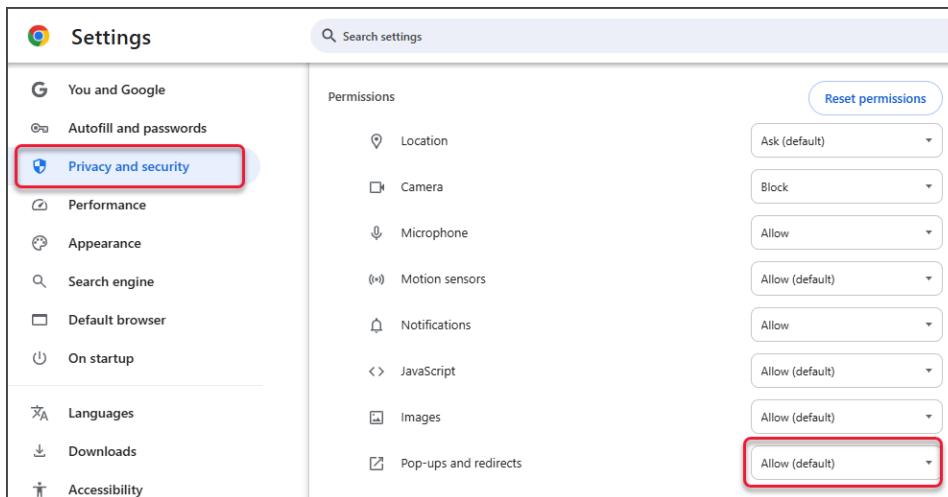

Check that Chrome does not have popup or redirect blocking enabled, as shown below.

Check that the web page allows popups:

1. Select the icon to the left of the URL.

2. Select **Site Settings**.
3. Select **Privacy and Security**.
4. Under **Permissions**, check **Pop-ups and redirects** is set to **Allow**.

### Check that Chrome allow popups:

1. Select the three dots on the top right of your Chrome browser.
2. Select **Settings**.
3. Select **Privacy and Security > Site Settings**.
4. Under **Content**, select **Popups and redirects**.
5. Check that **Sites can send pop-ups and use redirects** is selected.
