

Secure Send setup

Version: 1.00 | Last Modified on 21/07/2025 11:05 am AEST

Secure Send uses email or ZedSMS to send invoices, referrals and documents to a patient, a next-of-kin or thirdparty Account Payer using a link to a secure download page.

To request access, submit a Secure Send request form.

Practice preparations

Considerations

- Secure Send is a free feature. However, the SMS option requires ZedSMS and uses ZedSMS credits.
- The email and SMS sent to the patient will show the practice name but not the practice email or phone number.
- Documents will be available in the Secure Send portal for seven days.
- If multiple documents are sent within 15 minutes, one notification will be received to give access to all documents.
- Printing a document sent to a mobile phone may pose problems for some patients.
- We also recommend the Secure Send User guide and the Secure Send FAQ.

Security

- Documents are securely transmitted via HTTPS and stored in encrypted, Australia-based Amazon (AWS S3) cloud storage. They are automatically deleted seven days after being sent.
- To access the document, the patient receives a pin using the same email or mobile number that sent the document link.

Requirements

- Patient: The patient (or payer) should have their email address and mobile number in their patient record for the Secure Send delivery fields. The patient name and email/SMS will be used if there is no Payer in the patient's record.
- Payer: The Account Payer (patient or NOK) being sent the message should be set up as a payer in the patient's record. The default payer can be different, but the patient/NOK Account Payer must also be selectable.
- ZedSMS: SMS delivery requires ZedSMS and uses SMS credits. Without ZedSMS, Secure Send can be delivered using email.

Popular scenarios

- Telehealth and video consultations.
- In-patient consultations where electronic pathology and radiology referrals are preferred.
- In-patient consultations where invoices and documents need to be sent electronically to the patient.

Setting up Secure Send

Step 1 - Submit a Secure Send request form.

Zedmed will set up a branded download portal for your patients and will need access to your server to complete the setup. Please check that you are using Zedmed v36.5 or later before submitting the request.

Step 2 - Implement electronic signatures

Because your practitioners will send referrals and letters electronically, they will **electronic signatures** in their Doctors Details. If they do not, their letters and referrals will be sent without signatures. Follow the **Electronic signature guide** to create and add the signatures.

Step 3 - Set up radiology and pathology templates (Address Book)

To use Secure Send for pathology and radiology referrals, you must send the referral to an addressee who is set up with the pathology and radiology templates.

Why are these templates needed?

To use Secure Send for laboratory referrals, Zedmed's '**PathologyZedmedRequestForm**' or '**RadiologyZedmedRequestForm**' templates must be used. This is because lab-specific templates require the provider's physical paper. The Zedmed templates include all the information needed for a referral and use a merge field to apply the practitioner's electronic signature. Select this link to view the templates.

How do I add this addressee?

The Address Book guide has a dedicated section for adding a Secure Send Addressee.

Summary of steps:

- 1. Open the Clinical Address Book.
- 2. Set Type of Contact to Pathology or Radiology Laboratory.
- 3. Create a pathology addressee and add the 'PathologyZedmedRequestForm' template
- 4. Create a radiology addressee and add the 'RadiologyZedmedRequestForm' template.

See the screenshot below for an example.

Address Book Search		
Address Book Healt	Addressbook	
Name Zedm	Properties Locations	
Suburb	Details	Private Contact Details
Speciality All	lype of Contact Pathology Laboratory	Mobile Phone Home Phone
	Family/Business Name	AH Phone Pager

	Undate Details from HI Service	7 Help
	oposice octains from the perfect	

Step 4 - Set up your letter templates

A practitioner's signature will be added to any letter containing the merge field: Treating doctor > Signature Image.

The practitioner can delete the 'signature image' merge field if they want to print and manually sign.

- Review your letters and identify the ones that need to support electronic signatures for Secure Send.
- If required, create new letter templates for electronic signatures.
- Add the merge field *Treating doctor's name* and '*Signature Image*' to all letter templates that need to support Secure Send.

Step 5 - Set up a call with Zedmed

Once your Secure Send request has been processed, Zedmed will contact you to set it up on your server.

On this call, the integration will be enabled in the Practice Integrations screen.

Practice	Surgical Partners						
Branches Bank Accounts	This practice is not connected to Surgical Partners Connect						
Departments Integrations Claiming Configuration	Synchronise data with Surgical Partners Daily upload time (hour) 4 Manual Synchronisation						
	Electronic Document Transfer Enable Electronic Document Transfer This practice is not connected to the Electronic Document Transfer system. Payment Gateway Patient File Delivery Connection						
	Enable Electronic Payment Gateway Password Password Paste paste password Paste						
	Cubiko Integration Connect Cancel						
	Enable Cubiko Access to Database A subscription to Cubiko is required to use their services, this just enables access to your database. Click here for further details.						

Step 5 - Explain Secure Sent to your users

Advise your practitioners how to use Secure Send for referrals and letters.

Zedmed has a Secure Send guide and there is a dedicated section in each relevant guide.

Key information:

• For a radiology or pathology referral

Use the generic addressee with the generic template.

Use the Secure Send button on the Pathology or Radiology screen.

Secure Send		
Print Referrals	Print Referrals and Close	HealthLink Forms (Referral)

To learn more, see the:

- Sending the referral section Option 2 Secure Send of the Radiology referral guide.
- Sending the referral section Option 2 Secure Send of the Pathology referral guide.
- For a referral letter or clinical letter

Use the Send to Patient section of the distribute screen.

Use a letter template with an electronic signature.

Patient Black, Emma	his will send lownload wi	a download link for the selected file to Patient/Payer via Email and/or SMS. The Il prompt for a one-time password on the respective email/mobile no.
Patient Black, Emma		

To learn more, see the:

- Sending a Referral Letter section of the Write a referral letter guide,
- Secure Send the letter section of the Clinical letter guide.
- For Reception

Use to send a copy of an invoice from Invoice Details - Send to Patient > Send Secure Link

Print	Send to Patient	Suppress	Quick Pay	Cancel	Help

• For Batch Letters

Use for an individual patient's letter by right-clicking the patient and selecting Distribute.

• To learn more, see the Using Secure Send guide.

Monitoring Secure Send

Use Message Manager to view Secure Send messages for all patients with the Billing and Clinical Document filters.

Date	Date/Time Pa	atient	To/From	Status	Category	Response	Error Action	Status Act	ioned On	Actioned By
O Today O Yesterday	inere are no messages that	meet the filter citteria
