

Changes to MBS items, Bulk Billing & CDM

Version: 2.00 | Last Modified on 21/10/2025 8:33 am AEDT

1 November 2025: Bulk Billing Incentive changes

The eligibility for MBS bulk billing incentives will be expanded to all Medicare-eligible patients. This scheme will be available to participating practices that bulk bill every eligible service for every Medicare-eligible patient.

This change removes the age restriction and concession card requirements for the incentive items: 10990, 10991, 10992, 75855, 75856, 75857, 75858, 75870, 75871, 75872, 75873, 75874, 75875, 75876, 75880, 75881, 75882, 75883, 75884 and 75885.

To learn more, see the [MBS Online information PDF](#).

1 July 2025: Changes to Chronic Disease Management and MBS items

From 1 July 2025, GP management plans and team care arrangements will be replaced with a **single GP Chronic Condition Management Plan (GPCCMP)**. The existing MBS items for developing and reviewing GPMPs and TCAs will cease and new MBS items for the GPCCMP will be introduced.

Until Zedmed releases an update to its Chronic Disease Management module, the new **GPCCMP template must be manually added** to Zedmed and accessed via Quickdocs, as explained [in this guide](#).

For more information about these changes, including the **changes to the MBS items**, see the PDF provided by the [Department of Health, Disability and Aging](#) via the [MBS Online website](#).
